News release

ADP® Dealer Services certifies ProfitNet™ interface for w.e.b.Suite™ 2006 Dealer Management System (DMS)

WILMINGTON, Del. (Aug. 3, 2006)

DuPont Performance Coatings (DPC) announced that ADP® Dealer Services has certified the ProfitNet™ shop management system to interface with the w.e.b.Suite™ 2006 Dealer Management System (DMS), allowing shops to operate more efficiently and productively.

The new ProfitNet™ interface is a bi-directional electronic bridge between ProfitNet™ and the w.e.b.Suite™ 2006 DMS. The interface saves hours by eliminating double entry of data used by both systems. Key information including customer data, vehicle data, parts ordering and receiving, parts price increases, labor and repair order totals can now be seamlessly transferred. This interface also allows shops to import the ADP® repair order number into ProfitNet™ for consistency between the two systems.

“This latest bi-directional interface with ADP® is one of many more enhancements on the way for ProfitNet™,” said Tom McGarry, Information Technology Services Manager for DPC. “DuPont Performance Coatings and our partner YADA Systems are dedicated to enhancing ProfitNet™ with the latest technology to lower shops’ administrative costs

by minimizing redundant computer tasks. We’re committed to providing a management solution that is affordable, easy to use and communicates with dealer management software, paint software, parts software, and accounting software.”

“The ProfitNet™ application marks a significant improvement over the time-consuming process dealerships endured previously,” said ADP® Director of Strategic Alliances, Beth Ayotte. “This interface ensures security and integrity at all levels, allows dealers to better analyze and manage the collision repair process, and reduces errors and unnecessary delays that can impact customer satisfaction.”
